D-SAM
INTERNATIONAL

Our wide range of laryngoscope helps professionals to get freedom of choice and confidence to particular airway procedures.

• LARYNGOSCOPE FO GREEN SYSTEM REUSEABLE

LARYNGOSCOPE FEATURES

- All blades are made from the finest non-magnetic stainless steel which reduces the risk of contamination.
- Cool and bright LED light with no chance of tissue burns during long intubation procedures.
- The high quality of the glass optical fiber provides maximum bright illumination to view the larynx of the human body clearly.
- The removable FO light guide can be autoclaved separately, which makes the blade life longer.
- Autoclavable at 134Co /4-5 min, for 1500-1800 cycles at maximum light output.
- All blades and handles are made to ISO 7376-2020, allowing compatibility with other brands in the world.
- LED lamps have life time of 50,000hrs and continued 2hrs operating time.
- Brighter than Xenon lamp with 5000-7000 LUX transmission light at the tip of the blade.
- LED Lamps produce cool and bright light with 6500-7000k color temperature.
